

# IMTIAZ MAMUN

I am an ambitious problem solver with a passion for developing, and I would like to join a team of open-minded developers. I have much experience of creating logical and innovative solutions to complex problems. I am thorough and precise in everything, and I have a keen interest in technology, web application, mobile applications and user experience. I take responsibility for my own personal development, I am continually evaluating and upgrading my skills so that I could stay at the cutting edge of web and mobile application development. I have successfully completed several projects for university, IT consultancies, software houses, web agencies, and IT departments.

Right now I am looking for a suitable position with a company where outstanding performance is identified and where I can work on a variety of high profile projects.
