Portfolio: antu-mamun.github.io

Lead Backend Engineer specializing in scalable system design, microservices, and cloud-native architectures. Proven ability to lead backend teams, architect high-performance APIs, and drive technical excellence across the development lifecycle. Experienced in reducing technical debt, improving system reliability, and delivering secure, maintainable solutions. Strong background in AI and data-driven systems, focused on building resilient and scalable backend infrastructures.

WORK EXPERIENCE

Technical Lead Engineer

The Data Island, Dhaka, Bangladesh

Technology Department

Nov 2025 - Present

- **Led Backend, Frontend, and Mobile development**, building scalable microservices and reducing technical debt.
- **Designed end-to-end solutions as Solution Architect**, designing scalable and cost-efficient systems.
- **Managed database architecture**, ensuring performance and data integrity.
- **Ensured security, performance, and high availability** across systems.
- **Led CI/CD, DevOps, and cloud deployments**.
- **Led and mentored 10+ engineers**, including the AI team.

Founder & CEO

Aarbaah Digital Solution, Dhaka, Bangladesh

Proprietor

Apr 2024 - Present

- **Founded and scaled** a digital solutions company delivering web and software services.
- **Led product strategy and architecture** for client and internal solutions.
- **Managed clients and teams**, driving delivery quality and business growth.

Software Engineer (Officer)

United Commercial Bank PLC, Gulshan, Dhaka, Bangladesh

Technology and Innovation

Mar 2025 - Sep 2025

- **Led full-stack and microservices development**, building scalable and high-performance systems.
- **Designed and automated workflows** while managing data systems for business insights.
- **Ensured secure architecture** by collaborating with UX/UI and enforcing financial-grade security practices.

Software Engineer

upay (UCB Fintech Company Limited), Gulshan, Dhaka, Bangladesh

IT Division

Oct 2022 - Feb 2025

- **Led full-stack and microservices development**, building scalable and high-performance systems.
- **Designed and automated workflows** while managing data systems for business insights.
- **Ensured secure architecture** by collaborating with UX/UI and enforcing financial-grade security practices.

Full-Stack Programmer (Officer)

Beximco Pharmaceuticals Limited, Dhanmondi, Dhaka, Bangladesh

Multimedia Department

Jun 2018 - Sep 2022

- **Developed and delivered** in-house and promotional full-stack applications end-to-end.
- **Designed system workflows** and collaborated with UX/UI for scalable architecture.
- **Optimized data processing and reliability**, enhancing efficiency and system performance.

EDUCATION

United International University

Bachelor of Science (B.Sc)

Computer Science and Engineering

United City, Madani Ave, Dhaka 1212

Sep 2013 - Feb 2018

Government Bangla College

Higher Secondary Certificate

Science (with Higher Math and Biology)

Mirpur, Dhaka, Bangladesh

Jun 2011 - March 2013

Rajshahi Govt. Model School and College

Secondary School Certificate

Science (with Higher Math and Biology)

Rajshahi, Bangladesh

Jan 2009 - Feb 2011

SKILL EVALUATION

Front-end Development: 

Back-end Development: 

UI / UX Design: 

System Architecture: 

DevOps Engineering: 

AI / Machine Learning: 

TECHNICAL SKILLS

- **Programming Languages:** Python, TypeScript, JavaScript, Java, PHP, C and C++ , Shell Scripting
- **Front-end Development:** Next.js, React.js, Tailwind CSS, Redux, jQuery, Ajax, Bootstrap, HTML, CSS, SCSS, SVG, Cross-Browser Compatibility
- **Back-end Development:** FastAPI, Django, Node.js, Express.js, Nest.js, Meteor.js, PHP, JSP
- **Native Mobile Application:** Android Native Programming (Java + Kotlin), Google Play Console and APIs, Augmented Reality, Android Studio and Unity
- **Database Management:** PostgreSQL, Firebase, MongoDB, Redis, DynamoDB, SQLite, MySQL
- **Automation Expertise:** Docker, Kubernetes, ORM, Celery, JWT, OAuth2, ETL, Cron Jobs, Nginx, Apache, Gunicorn, PM2, Unit Test, Arduino Programming, IoT
- **Cloud Service Management:** Vercel, GCP, AWS, Hetzner, DigitalOcean, Namecheap
- **CI/CD Pipeline:** GitLab, GitHub Actions, Bitbucket Pipelines
- **Machine Learning:** Natural Language Processing, TensorFlow, Artificial Neural Network, Pattern Recognition, Deep Learning, NumPy, Pandas, Scikit-learn
- **Data Format:** JSON, YAML, XML, CSV, HDF5, XLSX
- **UI/UX and Prototyping:** Figma
- **Industrial Skills:** Jira, Trello, Zoho Projects, Agile Development, SDLC phases, SWOT Analysis, Use Case and UML Diagram, Analytical, Statistical, Flexible and Quick Learner
- **Operating System:** MacOS, Linux, Windows

RESEARCH & PUBLICATIONS

- **IEEE Publication:** Event Detection and Knowledge Mining from Unlabeled Bengali News Article [Link](#)
- **B.Sc Thesis:** Event Detection and Violence Recognition
https://www.researchgate.net/publication/374331912_Event_Detection_and_Violence_Recognition

PROFESSIONAL PROJECTS

- **ULens – Field Force Management System**
Technologies: Python, FastAPI, MongoDB, Motor (async), Docker, AWS Rekognition, S3, SQS, Flutter, Next.js
Highlights: Built AI-powered field force and ERP platform with GPS validation, AI visit analysis for Field Force, POSM tracking, OTP auth, and attendance/leave management with role-based reporting.
Company: Unilever Bangladesh Limited (UBL)
- **Bulk Onboard and Salary Disbursement**
Technologies: Python, Django, ReactJS, PostgreSQL, Docker, Kubernetes
Highlights: Web app for seamless onboarding, secure bulk uploads, tokenized salary disbursement, dynamic ledger reports, and role-based access control.
Company: UCB Fintech Company Limited (upay)
- **Service Operations and Reporting**
Technologies: PHP 7, jQuery, Ajax, PostgreSQL
Highlights: Real-time dashboards with charts and logs, microservice-driven bulk reporting, multilevel transaction monitoring for merchants, agents, and customers.
Company: UCB Fintech Company Limited (upay)
- **Digital Prescription**
Technologies: Python, Tkinter, SQLite
Highlights: Desktop tool for creating, printing, and storing prescriptions with smart medicine suggestions and historical patient data tracking.
Company: Beximco Pharmaceuticals PLC (BPL)

PERSONAL PROJECTS

- Bengal Aid E-Commerce Platform**
Technologies: Python, Typescript, Next.js, FastAPI, REST APIs, Payment Gateway, Firebase Realtime Database
Highlights: Architected scalable e-commerce system with optimized UX, secure payments, and efficient order management.
Live: bengalaid.com
- Clinic & Hospital Management System**
Technologies: Next.js, TypeScript, FastAPI, Firebase Realtime Database, Shadcn UI
Highlights: Built scalable healthcare platform with patient registration, diagnostic test management, cabin-bed management, billing, role-based access, and real-time analytics/reporting.
Live: acare.aarbaah.com (Demo credentials - Email: admin@aarbaah.com, Password: admin@aarbaah.com)
- Appointment Service Manager**
Technologies: React, Redux, Styled-components, React Router, XLSX.js
Highlights: Provides dynamic appointment scheduling with responsive UI across devices. Features real-time updates and report export to Excel for administrative tasks.
Demo: doctor-calendar.vercel.app
- SaaS Product Suite (KYC and Biometric Intelligence)**
Technologies: Next.js, Tailwind CSS, Node.js, JavaScript
Highlights: A collection of modular SaaS solutions designed to streamline onboarding and verification workflows. Includes:
 - Bank Account Onboarding Form
 - Printable KYC Form
 - Face Liveness Detection and Facial Emotion Recognition (happy, sad, angry, etc.)
 - OCR-based Text Detection from Captured Images
 - Speech-to-Text Conversion Module**Demo:** saas-products-nine.vercel.app
- Yield Booster**
Technologies: Java, JSP, Spring MVC, MySQL
AI Modules: K-Means Clustering, KNN Classifier
Highlights: Predicts crop types using soil nutrients, pH, climate data; clusters crops by season, cost, and yield potential for optimized farming.
- Auto Smart City**
Technologies: Android, Java, JSP, Spring MVC, Firebase, MySQL
AI Modules: Ant Colony Algorithm, TF-IDF, Priority Scheduling, Reinforcement Learning
Highlights: Real-time route optimization to reduce traffic using GPS data. Alerts users on high-traffic routes and dynamically assigns routes based on start time, location, and destination distance.

LANGUAGE PROFICIENCY

Bengali	Native proficiency
English	Professional working proficiency
Hindi & Urdu	Conversational proficiency (Listening and Speaking)

PERSONAL INFORMATION

Nationality:	Bangladeshi
Home Town:	Puthia, Rajshahi
Marital Status:	Married
Present Address:	Adabar, Dhaka-1207
Interests:	Chess, Table Tennis, Guitar, Planting, Technology, International Politics
